

## EROSION AND SEDIMENT CONTROL TRAINING

1 and 3 day courses available

### Specialised skills and knowledge

Erosion and sediment control is a specialised field which is often poorly planned and implemented, causing asset damage, land degradation, water pollution and potential litigation.

These training courses introduce the fundamental concepts regarding erosion and sediment control to participants along with practical examples and solutions.

Training is presented by experienced leaders in the ESC and Land Degradation Sectors in Australia. Participants (of 3 day courses) will be suitably prepared to sit the IECA Fundamentals CPESC exam.

### TOPICS COVERED

- ESC principles
- Erosion - risk factors, types and impacts
- Erosion hazard assessment
- RUSLE and its use
- Developing ESC Plans
- Correct choice of controls
- Implementation & monitoring

### VENUE

Training is regularly scheduled for regional locations throughout NSW, Qld and WA.

### REGISTRATION

To register your interest, please contact us at [training@landloch.com.au](mailto:training@landloch.com.au)

### COST

3 day course: \$2,100 (inc. GST)

### WHO SHOULD ATTEND?

- Construction Managers
- Design Engineers
- Environmental Managers
- Council & Govt. Regulators
- Rehabilitation Practitioners
